

Youkali Board

Made in USA

Youkali Board, just to experience fun moments...

In family,

Spend the day on the Youkali Board, bring your cooler and do nothing. Just swim, chat with others, your feet in the water... If the current is pushing you, a small anchor is enough to keep the Youkali Board in place. No need for a trip, Youkali Board is the pontoon where we have fun to meet!

In a trip,

A walk in Youkali Board is a moment of tranquility. No speed, we appreciate the scenery that scrolls slowly. Using the paddle or the electric motor, we observe the birds without frightening them. The shallow draught allows to discover small rivers. Lying on the deck, everyone organizes their own life. No question of going on the high seas, Youkali Board is made for calm and closed waters. If the waves are too high, they will pass over the deck without compromising security. And it will be time to go home!

To Fish,

Fishing on the Youkali Board is a double pleasure. First because it offers a flat and very stable surface. Second, because it allows to have a passenger who can sunbathe comfortably if he or she wants to. Isn't it nice to share your pleasure with those who you love?

With a small outboard engine,

Youkali Board is sold without engine, only with two paddles. But a small engine is sometimes not a luxury. With a 2 HP, Youkali Board goes without any problem. An electric motor is even better to enjoy the nature! Be careful when using the engine! And remember, Youkali Board allows you to appreciate nature, not to get hurry. To go fast, there are much more suitable boats...

Youkali Board

Brazil is at Youkali Board's roots: Inspired by the famous Jangada, the traditional boat of the fishermen of northeastern Brazil, it takes back its form and its originality.

13 feet long by 5 wide, Youkali Board is a low-slung board so that the contact with nature is better. You can easily swim, run with a foot or a hand in the water! And because of its catamaran shape, it is incredibly stable.

Our goal has been to design a product that allows everyone could use. No need for learning, use is spontaneous! Whatever your age, one usage will match your expectation. And you always could explore new activities (rowing*, sailing* ...)

Youkali Board weighs only 125 lbs, thus facilitating its manipulation despite its large size. It is designed to support up to 4 people (628 lbs). No need for anything other than paddles to make it move!

Built to withstand mechanical and chemical aggressions, Youkali Board does not require any maintenance. But, like anything that you dare, it is always better to take care!

Finally, Youkali Board is yellow, full of sunshine like Brazil! The color is also a guarantee of safety by being visible, many power boats may pass around.

Youkali Board

They are so many possibilities to use a Youkali board!

- ✓ **Safety of kayakers and swimmers**
Easy for people to go back on the kayak after capsizing...
- ✓ **Rescue during flooding**
Able in skinny water, light and could carry sick, heavy people...
- ✓ **Renting companies**
4 people, accessible to any physical conditions
- ✓ **Marinas**
People can stand up during the transfer to their boat
- ✓ **Camping**
Adapt a tent and enjoy the platform...

And so on...

** In development - 2020*

Youkali Boards does not sell a boat but a support that allows you to do what you want. Like riding a bike, the goal is to discover nature, not to discover the bike! The goal is to have fun together!
